Paper / Subject Code: 42171 / MACHINE LEARNING

		B.E. SEM	VII / COMP	P/C SCHEME	/ DEC 2023 / 26.	12.2023		
	(2	1) Question No 1 2) Attempt any the	hree questio	ory. ons out of the rem equired and state	11 720	EXAM!	Total Marks:80]	
Q1		Attempt any FO	UR from th	e following		RAIGAD		[20]
	A	Explain how to choose the right algorithm for machine learning application.						
	В	Explain Linear Discriminant Analysis.						
	C	Explain any five performance measures along with example.						
	D	Differentiate between Logistic regression and Support vector machine.						
	E	Explain the following Receiver operating characteristics curve and Area under curve. Explain clustering with minimal spanning tree with reference to Graph based clustering.						
Q2	A	1.6	~					[10] [10]
02	В							
Q3	А	Explain the concept of regression and enlist its types. A clinical trial gave the data for BMI						
	and Cholesterol level for 10 Patients as shown in table below. Identify the machine learning method used to solve the above problem and predict the likely value of Cholesterol level for							
		someone who has BMI of 27.						
			7 21	24 28 14	16 19	22 15	18	
		Cholesterol 1		210 240 130		56 130	170	
	В	Explain the nece	essity of cros	s validation in Ma	chine learning applic	ations and	K-fold cross	[10]
		validation in detail.						
Q4	A	Explain support vector machine as a constrained optimization problem. [10]						
	В	Explain the concept of decision tree. Consider the dataset given in a table below. The dataset [10]						
		has 3 features as Past Trend, Open interest, Trading volume and one class label as Return.						
		Compute the Gini Index for all features and specify which node will be chosen as a root node						
		in decision tree.						
			Past Trend			Return
